

Online Subject Knowledge Enhancement Courses  
Delivered under your brand

# Join Us

# Solutions to aid your SKE

## Join our Partnership

We invite you to become a **VIDLEARN®** Partner in the delivery of Online Subject Knowledge Enhancement Courses (SKE). Join our growing partnership and benefit from a bespoke, fully resourced suite of SKE courses that you can use to support your ITT programme.

You will have a unique website branded to your HEI, SCITT or School Direct programme, providing you with a ready-made SKE provision to enhance the courses that you offer.

## Why Partner with VIDLEARN®

Offering your own in-house SKE courses in partnership with **VIDLEARN®** will help you widen your selection and recruitment to trainees with a variety of backgrounds. You can begin to develop a relationship with your trainees earlier and can track their progress through the SKE.

Where trainees need additional support, this can be identified at an earlier stage. Our SKE provision can be seamlessly incorporated into your existing ITT programme, adding an important pre-ITT element to ensure that all your trainees are fully prepared for the ITT year.

## During Uncertain Times...

Since July 2020, when funding became uncertain for many of us, **VIDLEARN®** resolved to keep the ITT Community up to date. We now look to be approaching a more settled time for SKE where we have the stability to plan and offer solutions that will be relevant for the next five years.

## For the period Jan 2021 to September 2021

Whilst there are still many unanswered questions, we have received broad details of provision and those who delivered SKE last academic year will have received an allocation that will take them up to September 2021. The highlights are:

- Geography no longer funded
- 8 - 28 week courses supported but with caveats
- Physics courses can commence from January 2021
- All other subjects from April 2021
- Allocations will not be increased this academic year

# delivery for up to 5 years

## For the period September 2021 and beyond

The government invited providers to bid for SKE in early 2020 but had to defer the process for a year due to COVID. We are to be re-invited later this year and successful applicants will enjoy a 4 year contract.

Whilst it would be pure speculation to forecast the potential changes to the Bid, we are poised with partnership opportunities that suit your requirements and meet the terms of the bidding process

## How can you join our Partnership

We have two set solutions but will attempt to give you a bespoke deal if you fall outside of both. For each partnership **VIDLEARN®** will:

*Create a bespoke branded SKE site providing details of the courses available and online application forms;*

*Provide all the online content for the SKE courses.;*

*Manage the application process including sending trainees welcome packs and course materials;*

*Provide training for SKE tutors and SKE administrators (if applicable);*

*Provide 24/7 technical support for tutors and trainees.*

### **Option 1: We bring the tech, You bring the magic:**

This option will suit the bidding process in that you bid as main supplier and we are registered as a subcontractor. It's our preferred relationship and most successful with you delivering the core educational aspects beyond the online content and support we provide. If you select this option you will be responsible for drawing down funding and paying bursaries together with tutoring the trainees. You will retain the majority of the SKE programme funding.

### **Option 2: We do everything, you track progress**

This option may suit providers who do not have the capacity to provide the administration, support and subject specific expertise to deliver their own SKE. Your involvement can be as much or as little as time allows but access to your trainees progress is at the press of a button, right down to what lectures they watched and for how long. You will still receive a branded website with just your trainees enrolled.
